ABOUT SCHOOL WITHOUT WALLS @ FRANCIS- STEVENS

Mission Statement

School Without Walls

@ Francis- Stevens administrators, teachers, parents, and community are committed to achieving our mission:

To nurture and prepare all of our students to reach their full potential as lifelong, self-directed learners in a caring and supportive academic community. Ultimately, students are prepared to think critically, exhibit organizational skills, problem solve, demonstrate self-discipline, and advance to high school prepared to perform in a rigorous academic environment.

Geometric artwork by Early Childhood Education students.

Early Childhood Education

Our early childhood education program, which includes Preschool (Age 3) through Kindergarten (Age 5), utilizes the *Tools of the Mind Curriculum*, as well as a rotation of Spanish, Art, and Music electives.

We are very proud of our Early Childhood Education teachers, whose professional knowledge, natural talent, warmth, and nurturing, guide each child through important early milestones.

Elementary and Middle School

School Without Walls @ Francis-Stevens is excited to work collaboratively with parents, teachers, students, and the community to implement a rigorous and engaging (PreK-8) academic curriculum, raise academic expectations, support student needs, align the middle school curriculum with the School Without Walls Senior High School curriculum, and create a school culture that is invested in the mission of the school.

The faculty from both campuses will participate in meaningful professional development opportunities to support academic growth, extra curricular activities, athletics, and community service opportunities for students.

Community Partners

Our neighbors are respected local and national organizations that partner and contribute to our school:

- American College of Cardiology
- Architecture in Schools
- Association of American Medical Colleges
