

Teachers, parents, residents, education leaders and advocates of all kinds, come join the conversation! Hear and discuss with Dan Willingham:

Why Knowledge Matters:

The need for a rich curriculum, from the earliest ages

Daniel Willingham

Wednesday, June 1
6:30-8pm
McKinley High School
151 T St. NE

Dan Willingham is a noted cognitive scientist and professor at the University of Virginia. He writes the “Ask the Cognitive Scientist” column for the *American Educator* magazine. Far more than most academics, he has worked to make cognitive science findings useful and understandable to teachers and schools.

The Office of the State Superintendent of Education and the State Board of Education are poised to consider revisions to DC’s current accountability rules and to high school graduation standards. The question of what is fundamental to students’ education is a critical one. **Ward1EdCouncil**
